

SANATORIA 2020: An announced flop!

The SANATORIA 2020 which was supposed to regularize invisible workers in the agricultural sector and domestic work has been proven ineffective:

- **207,542** applications received by August 15, 2020 (far from the estimated 600,000);
- **85%** of these are for **domestic work and personal assistance**
- Only the **15%** of the applications comes from the **agricultural sector**, the main area where it was directed;
- Only the **6% of all requests were processed 8 months after the closing of the sanatoria** (data: February 2021);
- At least the **90%** of the cases were for **the workers themselves**, instead of the employers, **who did it charged with taxes and contributions set for the sanatoria**, as the employers were not minimally interested in the emergence of their employees from the condition of undeclared work;
- In some prefectures, employers are summoned to grant a residence permit, within **THREE years!**

WHAT REGULARIZATION IS IT?

It is not fair that we immigrants have paid € 500 in taxes, while the state gets rich at our expenses and doesn't do its job!

We don't want to be invisible anymore, we can't wait any longer !!!

We ask for:

1. Residence permit for amnesty applicants and asylum seekers;
2. Right to work and a living wage;
3. Stop the exploitation of agricultural laborers and caretakers;
4. Right to access essential public services (health, education, unemployment, pension etc.)

Not only **DUTIES** but also **RIGHTS** !!!
